OBJECTIVE

Full Stack Specialist Developer and Techlead with 4 years of experience leading a group of more than 20 people and developed more than 30 software, including websites, apps and systems (apis), who values working in healthy environments with good communication and trust. I look for more development and learning challenges. I am able to work under pressure with many people and in dynamic environments with high context switching.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer

Liga - Facens, July 2019 - Now

- Mobile apps built with Ionic, Angular (HTML5 and CSS3) and Typescript (Javascript) for a variety of businesses and government organizations.
- REST APIs architected in NestJS (NodeJs) for deployment within AWS using AWS Lambda and integrating with services such as S3, Api Gateway, SQS, SNS, SES, Cloudfront.
- Services designed and implemented within AWS.
- Created classes to teach and integrate new members to the dev team.
- PWA and web development softwares with SCRUM, kanban and git (version control system).
- Integrations with Google Maps, MaterialUI, Bootstrap, Leaflet, Capacitor and other external systems.
