OBJECTIVE

Senior Software Engineer with 7+ years of experience building scalable web applications, cloud-native architectures and enterprise software solutions.

Delivered more than 40 projects across healthcare, education, government, agriculture, media and SaaS industries. Strong expertise in Typescript, Angular, React, Node.js, NestJS, AWS and modern software architecture.

Experienced working directly with US-based companies and international teams, contributing to healthcare platforms, payment systems and high-traffic applications. Proven track record in technical leadership, mentoring developers, software design, cloud infrastructure and end-to-end product delivery.

Passionate about solving complex business problems, building reliable systems and continuously improving engineering practices.

TECHNICAL SKILLS

Frontend:

Angular, React, TypeScript, JavaScript, HTML5, CSS3, Ionic

Backend:

Node.js, NestJS, Express, REST APIs

Cloud & DevOps:

AWS Lambda, API Gateway, S3, CloudFront, SNS, SQS, SES, EventBridge, CI/CD

Databases:

PostgreSQL, MySQL, MongoDB, SQLite

Tools:

Git, Docker, Scrum, Kanban, Jest, Jasmine

PROFESSIONAL EXPERIENCE

Senior Software Engineer

ICANotes, Sep 2023 – Present

- Develop and maintain a behavioral healthcare EHR platform used by therapists, psychologists and psychiatrists across the United States.
- Design and implement scalable backend services using Node.js, NestJS, MySQL and AWS cloud services.
- Build and maintain Angular applications supporting clinical workflows, billing operations and insurance integrations.
- Developed ERA (Electronic Remittance Advice) processing solutions, improving payment reconciliation and insurance claim workflows.
- Collaborate directly with US stakeholders, product managers and engineering teams in a fully remote environment.
- Participate in architecture discussions, technical planning, code reviews and engineering best practices.

Tech Stack: TypeScript, Angular, NestJS, Node.js, MySQL, AWS

Software Engineer

Dev.Pro, Mar 2023 – Sep 2023

- Worked on Xenial Data Management Cloud, part of Global Payments, serving large restaurant and retail chains.
- Developed and maintained Angular and Node.js applications integrated with cloud services and CI/CD pipelines.
- Contributed to solutions used by brands such as Taco Bell, Burger King and CosMc's (McDonald's).
- Implemented automated tests including unit, integration and end-to-end testing.
- Collaborated within an international team following Agile and Scrum methodologies.

Tech Stack: Typescript, Angular, Node.js

Full-Stack Developer

Liga - Facens, July 2019 – Mar 2023

- Delivered more than 40 software projects including web applications, mobile apps, PWAs and cloud-native backend services.
- Served as Technical Lead for a development group of more than 20 software engineers.
- Conducted regular one-on-one meetings, mentoring sessions, onboarding programs and technical guidance for developers across multiple projects.
- Led code reviews, technical discussions and software architecture decisions.
- Designed and implemented scalable REST APIs using NestJS, Node.js, PostgreSQL, MySQL and MongoDB.
- Architected and deployed AWS cloud solutions using Lambda, API Gateway, S3, CloudFront, SNS, SQS, SES and EventBridge.
- Worked directly with enterprise clients, government organizations and educational institutions.
- Built solutions serving thousands of users across healthcare, agriculture, education, sustainability and public service sectors.

Tech Stack: Angular, React, Ionic, NestJS, AWS, PostgreSQL, MySQL, MongoDB

EDUCATION

ADDITIONAL SKILLS

Bachelor of Computer Engineering

Facens - "Faculdade de Engenharia de Sorocaba"

2018 - 2022

- Leadership & Mentoring
- Software Architecture & System Design
- Cross-functional Collaboration
- Ability of mentoring other developers with pair-programming and code-review
- NASA Simulation Exploration Experience
- Exchange Program in Austria
- Volunteer at Lions Clubs International (10+ years)

KEY PROJECTS (Additional projects available at: <https://henriquerod.com/>)

ICANotes (Healthcare SaaS - USA)

- Behavioral healthcare EHR platform used by therapists, psychologists and psychiatrists across the United States.
- Developed billing, insurance and payment processing solutions using Angular, NestJS, MySQL and AWS.

eClub (Sports Prediction Platform)

- Designed and developed a sports prediction platform focused on scalability and high user engagement.
- Built full-stack solutions using Angular, NestJS, PostgreSQL and AWS cloud services.

Ecologicatech (Environmental Management Platform)

- Developed a full-stack platform for environmental management and carbon footprint analysis.
- Integrated Google Maps APIs to calculate distances, transportation impact and CO₂ emissions.
- Built cloud-native services using Angular, NestJS, PostgreSQL and AWS.
- Implemented business rules to estimate carbon compensation through tree planting metrics.

Poliedro P+ (Education Platform)

- Developed backend services for an educational platform serving more than 100,000 users.
- Built APIs and integrations using NestJS, PostgreSQL and MongoDB.
